VICTIM IMPACT STATEMENT

People vs. Jordan Bormann File # 8653

Dear Mr. Berry
This form is your opportunity to provide input into the case involving the above-named defendant. The court is very interested in your views concerning this matter. Any information you provide will be reviewed and taken into consideration by the court for this or for any other possible future proceedings such as probation and parole. If you have any questions, need assistance with this form, or any other information, please contact our Victim Services Coordinator Connie Stowell at 867-1428. Thank you in advance for your assistance.

Your Account of Incident:
On 9/30/22, I was assaulted by Jordan Bormann as I was videoing a verbal altercation on the public sidewalk in front of the house next door, 328 Pleasant Avenue, Herkimer--the home of Kimberly Vargas. The altercation was between Jordan's mother Kimberly (Bormann) Vargas and my wife Linda Kaidan. This latest incident began when my wife was again harassed from the Vargas' porch while feeding the birds in our driveway.

Jordan Bormann charged me, shoved me violently backward onto the sidewalk, where I struck the back of my head on the pavement. I was rendered unconscious and left bleeding copiously. Jordan shoved my wife away as she tried to come to my aid. He screamed obscenities, then pivoted and kicked me with the heel of his shoe. This is corroborated by the videos from two surveillance cameras' videos provided to the Herkimer Police with my complaint.

Personal Injuries: I sustained a subdural hematoma (deep brain bleed) and lacerations to my scalp that had to be stapled shut. I was taken by ambulance to Little Falls Hospital and then by ambulance to Albany Medical Center for a neurological examination. I remain under the care of the Albany Medical Center Neurology Department. I was advised that 20% of subdural hematomas are fatal. I am easily fatigued, suffer recurrent headaches and am sometimes dizzy. At my age, many months are often required to recover from this sort of injury, which sometimes becomes chronic.

Property damaged or stolen: None.

Restitution sought for expenses related to this incident:

Medical and transportation expenses, to include ambulance, taxi and private vehicle rental necessary for outpatient treatment at Little Falls Hospital and Albany Medical Center. (We do not own a car.)

Your opinion of what the defendant's sentencing should be:
Jordan Bormann is of an age where he's responsible for his actions and accountable for them. He impresses me as volatile and violent. I hope his sentence sees him sent far from his mother's influence, where he can receive effective counseling and learn a vocation. To be just put on probation would leave him where he is now, 15 feet from our house, where he lounges on his mother's porch, eating takeout. (I admit to some trepidation seeing him so close at hand following his arraignment.)

I was a Special Needs teacher in Sarasota for some years. I specialized in Emotionally and Behaviorally Disturbed older teens, many with the same personality traits as Jordan Bormann exhibited on the day he attacked me. In my experience, he won't have a snowball's chance in hell of a decent life if he's returned to his mother Kimberly Vargas's clutches.

Typical of her behavior, on the day of the assault, Kimberly Vargas threatened my wife with bodily harm and also challenged her to "Hit me! Hit me!" (See video)

I've complied a short private-link YouTube video of incidents from the past two years of Kimberly Vargas threatening me and my wife and harassing our mentally ill daughter. There have been other incidents, but not captured on video. I have also provided a flash drive of the same video to the District Attorney's staff for inclusion with this statement. On the flash drive is also copy of this statement.

Sentencing should consider ways to keep Jordan Bormann from the malign influence of his mother, and away from his victim.
